No.003

Introduction of Thai GMB Industry Co., Ltd.

Thailand, is called "A country of smile" and famous for spicy and tasty "Tom-Yam Soup" and lovely "Thai-Silk". However, in recent years caused by the wave of motorization, many car manufacturers launched their factories there. Now Thailand is so-called "Detroit in Asia" as well.

Our youngest overseas factory "Thai GMB Industry Co.,Ltd." is located in 304 Industry Park Prachinburi where is 170km east from Bangkok and producing Water Pump since Sep. 2002 as well as Suspension and Steering Parts since Nov 2003.

The site area is 63,143m² and 230 employees are working in 2 shifts.

We would like to introduce the operation of our Thai-GMB this time.

Thai-GMB Co.,Ltd.

Aluminum die-casting and assembly lines

for Water Pump

Thai-GMB is producing a body part of water pump with latest die-casting machines and the capacity of die-casting factory is 320,000pcs/month.

Under a stringent quality control, Thai-GMB has acquired **"ISO/TS 16949"** in Jan 2005. These water pump bodies are not only assembled to water pump for after market, but also supplied for O.E. through oversea's GMB Group to car manufacturers.

Moreover, the production of components for Fan Clutches has also started since July 2005.

Assembly lines for water pump have a capacity of 190,000pcs/month, where all parts necessary for assembly are supplied within GMB Group. Especially, shaft bearings and mechanical seals –the major components for water pumps– are 100% supplied by "GMB Corporation Japan".

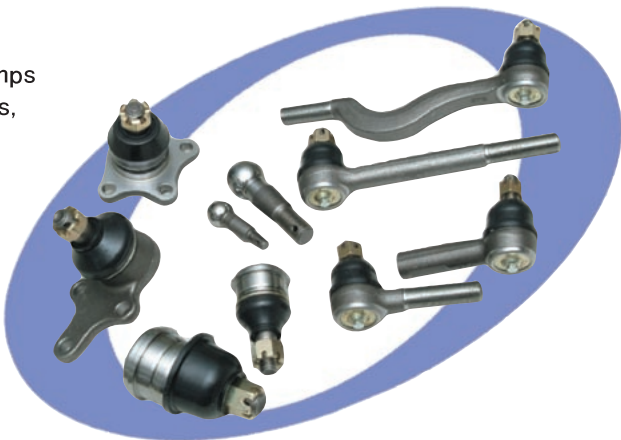

This is our integrated production system and in this way, a harmonized quality of the final product is assured to any end user, no matter if the same product is manufactured in any of the GMB factories in different geographical locations.

Suspension & Steering Parts

Our latest major product after Universal Joints, Water Pumps and Tensioner & Idler bearings is Suspension & Steering Parts, which is only manufactured by Thai-GMB in the house.

The production capacity is 170,000pcs/month so far.

High-tech tooling machines are used through-out the company to manufacture lines of products and to carry out any required test and controls.

High qualified engineers are supported by "state-of-the-art" computerized systems.

With a foundation of advanced technology in both materials and process, **"Thai-GMB Industry Co., Ltd."** will offer the highest in functional and quality automotive parts to meet the needs of customers.
